EACH ZEALOT COSTS + 10 Points

STANDARD ORDERS

INCREASED FIREPOWER

An Element may increase the number of Attack Dice rolled in a Secondary Weaponry Attack by +2. *This Order must be issued prior to any Initial Dice Roll.*

REPAIR THOSE BULKHEADS

The Element may remove a single Vulnerable Marker allocated to it. *This Order must be executed during the Execute Orders Step of the Order Dice Phase of a Turn.*

FORM UP!

The Fleet Commander may order the re-building of a Battle Group up to a maximum BR of 6. See the Ad-hoc Battle Groups rules in the rulebook. *This Order must be executed during the Execute Orders Step of the Order Dice Phase.*

UNIQUE ABILITY

BRILLIANT STRATEGY!

When rolling the order dice during the Order Dice Phase, you may reroll 1 Order Dice. The second result must be kept.

When you spend an Order Dice on an order, roll a regular D6 after resolving the order; on a **5** or **6** do not remove the Order Dice from your Data Sheet.
